Dogs, Cats, Fish, Birds, and Guinea Pigs are the 5 Most Popular Pet Animals.

YouTube Video on Animals

CAT

Scientific Name:– Felis catus

The cat (Felis catus) is a domesticated species of small carnivorous mammal. It is the only domesticated species in the Felidae family. It is commonly referred to as the domestic cat or domestic cat to distinguish it from the wild members of the family.

DOG

Scientific Name:– *Canis lupus familiaris*

The dog is a domestic mammal of the family Canidae and order Carnivora. Its scientific name is *Canis lupus familiaris*. The dog is a subspecies of the grey wolf and is also related to the fox and the jackal. The dog is one of the two most widespread and popular domestic animals in the world.

HORSE

Scientific Name:– *Equus caballus*

The horse (*Equus ferus caballus*) is a domesticated mammal with claws and feet. It belongs to the taxonomic family Equidae and is one of two subspecies of *Equus ferus*. The horse has evolved over the last 45–55 million years from a small, multi-footed creature, *Eohippus*, to the large, single-legged animal of today.

COW

Scientific Name:– *Bos*

Cows belong to the family Bovidae (ruminants with hollow horns, which also include antelopes, sheep, and goats), the subfamily Bovinae (which includes buffaloes and spiral antelopes), the tribe Bovini (which includes cattle, bison, and yaks) and the genus *Bos*, whose names are all derived from *bos*, the Latin word for cow.

SHEEP

Scientific Name: – *Ovis*

Domestic sheep (*Ovis aries*) are domestic ruminant mammals, usually kept as farm animals. Although the term sheep can also be used for other species of the genus *Ovis*, in everyday usage it almost always refers to domestic sheep.

BEAR

Scientific Name: – *Ursidae*

Bears are mammals of the *Ursidae* family. They can range from 1.5 meters long and about 60 kilograms (sun bear) to 1.5 meters long and over 1,000 kilograms (polar bear). They are found in North America, South America, Europe, and Asia.

DEER

Scientific Name:– Cervidae

Deer or true bucks are ruminant ungulates of the cervid family (Cervidae). The two main groups of deer are the Cervinae, which include the muntjac, elk (wapiti), red deer, and mule deer, and the Capreolinae, which include reindeer (caribou), white-tailed deer, roe deer, and moose.

CAMEL

Scientific Name:– Camelus

Camel, (genus *Camelus*), is any of three species of large, ruminant ungulates from the arid regions of Africa and Asia, known for their ability to go for long periods without drinking. The Arabian or Dromedary camel (*Camelus dromedarius*) has only one hump, while the domestic Bactrian camel (*C. bactrianus*) and the wild Bactrian camel (*C. ferus*) have two humps.

	<p style="text-align: center;">ELEPHANT</p> <p>Scientific Name:– Elephantidae</p> <p>Elephants are the largest land mammals and are characterized by their huge bodies, large ears, and long trunks. Among other things, they use their trunks to pick up objects, send out warnings, greet other elephants, or suck up water for drinking or bathing.</p>
---	--

	<p style="text-align: center;">FOX</p> <p>Scientific Name:– Vulpes vulpes</p> <p>Foxes are small to medium-sized omnivorous mammals belonging to several genera of the family Canidae. They have a flattened skull, triangular, erect ears, a pointed, slightly raised snout, and a long, thick tail (or brush). A red fox in Västernorrlands Län, Sweden.</p>
---	--
